2017-10-24

- After the first presentation some issues had to be addressed
- We've divided the work into different issues and are working on it individually and as a group

Basic view and fonctionnalities

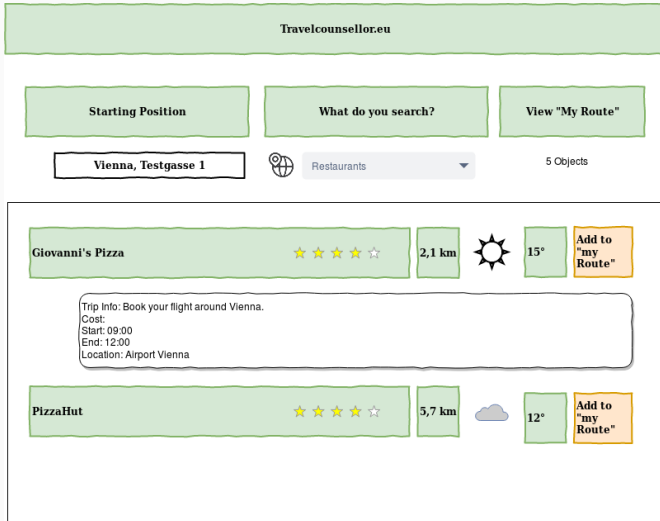

Figure 1: draft

Basic Weather API interaction

Getting Geoposition

Basic Google places API interaction

- We can request and receive details about an selected area
- We order the results in a particular to present the most desirable results at the top
